Testo:

In un precedente messaggio si era inviata l'informazione a proposito di un programma "Life Science Partnering China Europe". Ora ci giunge l'annuncio della prossima riunione a Pechino il 18 e 19 settembre.

Riporto il loro messaggio:

We are happy to announce the **1st Life sciences partnering event between China and Europe** held the 18 & 19 September 2006 in Beijing, China.

Europe Unlimited organises this event as part of a programme supported by the **European Commission's (EC) Life Sciences Health Directorate** and in partnership with the European Federation of Biotechnology (EFB) and the China National Centre for Biotech Development (CNCBD).

This event is a unique opportunity for European life sciences growth companies, development agencies and investors to meet with relevant potential partners in the Life Sciences sector in China. Our partner the CNCBD will ensure the mobilisation of relevant potential company partners and also investors, government agencies and health care organisations. Pre-arranged meetings will be organised with these potential partners and contacts for companies.

CNCBD is the life sciences agency of the Ministry of Science and Technology of the People's Republic of China.

If you would like to nominate candidates from your country interested in partnering with China, we would be pleased to send them an invitation. Just kindly send us a few lines describing their activity with China and contact details to aurelie@e-unlimited.com

The programme aims to promote partnerships, joint ventures and collaboration between the Chinese life science industry and growing European Biotech SMEs and development agencies.

As there is a limited number of places for European speakers and to leave enough time to mobilise relevant potential partners in China, we invite companies to confirm their interest **no later than 12 June**. We will also need a short CV, short company outline and description of potential partnering needs in China (each 300 words max).

We would be very grateful if you could circulate this information amongst your network.

I also invite you to visit the [website](#) for further details.

I am available should you have any questions and are looking forward to hearing from you.

Best regards,

Aurélie Manzi
